SAFETY IS NO ACCIDENT

Rear-End Collisions

Rear-End Collisions are bad, really bad. Why? Because the potential for injury is so high. Whether it's a light bump at an intersection or a harder impact on the highway, people get hurt when struck from behind.

How do you avoid causing a Rear-End Collision? It's simple...
INCREASE YOUR FOLLOWING DISTANCE.

SPEED MPH	15	2.9 Sec.	TOTAL TIME TO COMPLETE THE STOP
	30	4.0 Sec.	
	50	5.4 Sec.	
	60	6.0 Sec.
